Art Unit: 2823

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/12/02 has been entered.

Claim 28 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 28 it is confusing to recite that forming an opening in the hard mask comprises etching through the hard mask, which would form the opening, and etching another layer. It should be made clear that a further step to the process of claim 26 is recited.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 7-11,13-19,22-33 and 45-49 are rejected under 35 U.S.C. 103(a) as being unpatentable over the combination of Tang et al and Minegishi et al.

Tang et al and Minegishi et al are applied as containing the teachings stated in the rejection of claims 6-10,21-25,32 and 33 in the office action mailed 4/12/02.

Applicant argues that Minegishi et al do not disclose implantation of Si ions. However, the reference was not relied upon as containing that teaching. The reference is relied on as teaching formation of a LOCOS mask suggesting forming such a mask in the process of Tang et al.

Art Unit: 2823

Claims 2-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tang et al in combination with Minegishi et al as applied to claims 7-11,13-19,22-33 and 45-49 above, and further in view of Japanese Patent 5-175190.

Japan '190 is relied on as stated in the office action mailed 4/12/02 as providing motivation to include a Si co-implant in the LOCOS process of the combination.

Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tang et al in combination with Minegishi et al as applied to claims 7-11,13-19,22-33 and 45-49 above, and further in view of Japan '028.

Japan '028 is relied on as stated in the office action mailed 4/12/02 as providing motivation to perform the steps of the combination in the recited order.
